

Predictive analytics & Machinelearning

Digital Transformation

Linda Ramstedt Marklund

Virtual and Augmented reality

Pattern recognition and Anomaly detection

Robot Process Automation (RPA)

Machine learning Autonomous operation

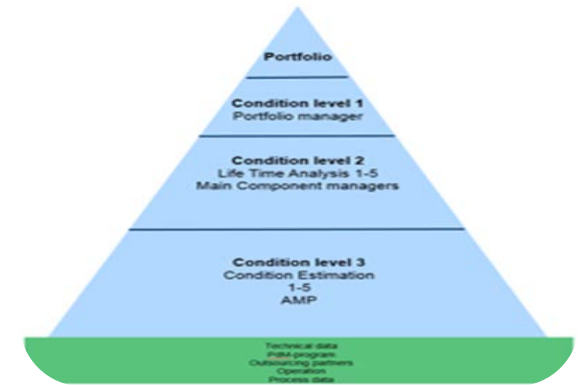

Drone and thermal camera

Video analytics and 360° videos

Location Intelligence

Data driven Condition based Maintenance

Autonomous plant

Data driven Condition based Maintenance

Machine learning Autonomous operation

Full scale roll-out

Business technology organization

Increased availability

Neural network models finds patterns in data

Streaming of data for anomaly detection

Implementation for all process data

Analytics as a service – no investment

Scalable solutions?

Small scale experiments machine learning

Asset digi team

Technology scouting
